NAUTILUS NITRO® PLUS WEIGHT STACK SHIELD UPGRADE

Announcing an upgrade to the weight stack shields on Nautilus Nitro® Plus:

In response to customer feedback, beginning April 1, the front weight stack shields will be changed from stainless steel to painted steel matching the frame color. This provides two main benefits:

1. More integrated look, especially on non-silver framed machines
2. Improved cleanability—the painted shields will not show smudges/finger prints as easily as stainless, and will wipe down much more readily

Contact your Nautilus® representative for more information.
