## FREECLIMBER® 4600 PT/CL

- One-piece soft pedals offer the ultimate in stepping comfort
- Patented, independent pedal geometry with four-bar linkage ensures safe, biomechanically correct movement
- The FreeClimber® 4600 models are backed by 17 years of proven performance and name recognition
- Speeds range from 26 to 174 steps per minute
- 20 Resistance Levels; Water bottle holder, reading rack and accessory tray included
- 4600 CL model is cordless

## FREECLIMBER® 4400 CL

- The upright, rail-less configuration encourages an improved exercise posture for the best lower-body workout of any climbing machine
- Space-saving design fits in less than 2' x 4' of floor space
- Patented, independent pedal geometry with four-bar linkage ensures safe, biomechanically correct movement
- Optional side handrails are available
- Speeds range from 26 to 174 steps per minute
- 20 Resistance Levels; Water bottle holder, reading rack and accessory tray included

## FREECLIMBER® 4200 PT

- Offers the same independent step-action, patented pedal geometry and electronic braking system as the original StairMaster® stairclimbers
- Computer console displays workout statistics including time, calories burned, distance traveled, floors climbed and step rate
- Features include four workout programs, each with 20 levels of intensity
- Optional side handrails are available
- Speeds range from 26 to 174 steps per minute
- 20 Resistance Levels; Water bottle holder, reading rack and accessory tray included

## STEPMILL® 7000 PT

- Patented revolving staircase with 8" high steps most closely duplicates the workout of real stairclimbing
- Revolving staircase speed may be varied from 24-162 steps per minute
- The easy-to-read, back-lit C40 LCD console motivates the user throughout their workout
- Includes Polar®-compatible telemetry Heart Rate monitoring
- 20 Resistance Levels; Water bottle holder, reading rack and accessory tray included
